

How to fully remove a Sakai Project Site from the Sakai system, to make it gone forever!

How to remove, delete, and make gone!

This document will show you how to delete a Sakai Project site. First, why would one want to delete a project site and what are the implications of doing so? Reasons could stem from wanting to be a good digital janitor, the removal of old content, or the disposal of sensitive data. The implications of following through with the delete process outlined below are serious. The site that you will be deleting will be gone forever, is not recoverable, and it is final.

The Delete Process

- 1) Click Home, then 'Worksite Setup'
- 2) You will have a list of sites, check the appropriate boxes, then hit the delete button.
- 3) That's it.

Remember you need to have a maintain role to remove a site.

	Worksite Title	Type	Creator	Term
<input type="checkbox"/>	Home			
<input checked="" type="checkbox"/>	2006-09 Hahn Projects	project
